OPERATION
To switch between modes, press and hold the ON/OFF button for 3 seconds while the fixture is switched on, it will flash to confirm the switch to the next mode. The solar panel also acts as a dusk sensor and will activate the fixture below 15lux.

Mode 1: If motion is detected, the fixture switches on at 100% emission. If no motion is detected for 30 seconds, the light output automatically switches to 25lm (3% of light output).

Mode 2: If motion is detected, the fixture switches on at 100% emission. If no movement is detected for 30 seconds, it will turn off

Mode 3: The luminaire will always remain on at 10% output (55 lumen) as long as the ambient brightness does not exceed 15 lux.
